

FAASTeam presents:

Pacific NW Aviation Weather

During this free 2-hour seminar, we will review aviation weather as it pertains to flying in the Pacific Northwest, and look at the various ways a pilot can obtain "official" weather briefings. The seminar will begin with a brief overview of general global weather theory, then focus on weather patterns and predictions specific to the Pacific Northwest. As many pilots have unfortunately found out, weather in this area of the country can change significantly with little to no warning. This seminar will focus on obtaining a good weather briefing and making an informed "go/no-go" decision for a flight in our area of the country during the various weather seasons.

This seminar is open to all pilots from Student through ATP!

Directions: Safety in Motion Flight Center is located at the Pierce County/Thun Field Airport (KPLU) in the Spencer Aircraft building. We're on the west side of the building, 1st floor.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
